

BEST EVER
ALL TERRAIN GEOLANDAR

 **YOKOHAMA**

GEOLANDAR
A/T G013

Benefits

4 deep main grooves

The four wide, straight grooves enhance drainage performance and provide exceptional maneuverability and anti-aquaplaning capabilities on wet surfaces.

OFF Road

Optimized lug groove

For the design, the lug grooves get narrower as they approach the center section and gradually wider as they approach the grounded edge of the shoulder. This helps to beat down off-road surfaces for greater traction.

3-D shaped sipes

The tyre employs uniquely developed 3-D shaped sipes. The sipes, which are shaped into a three-tier pyramid, suppress breakdown of the tread block. This contributes to exceptional stiffness on dry surfaces and outstanding edge effects on wet surfaces.

Middle Block
Center Block
Shoulder Block

New 3-D shaped sipes

OFF Road

Aggressive shoulder

The design of the shoulder section has been overhauled as well. In addition to improving the tyre's follow-up durability, the appearance gives an aggressive feel.
